Commercial

APPLICATOR

Spray Pave Perth

DATE

February 2021

PRODUCTS

- Dulux Avista Resurfacing Primer
- Dulux Avista Resurfacing Base Compound
- Dulux Avista Colour Oxide in Bluestone, Silver Sands & Jet Black
- Dulux Avista Extended Wear Sealer

THE PROJECT

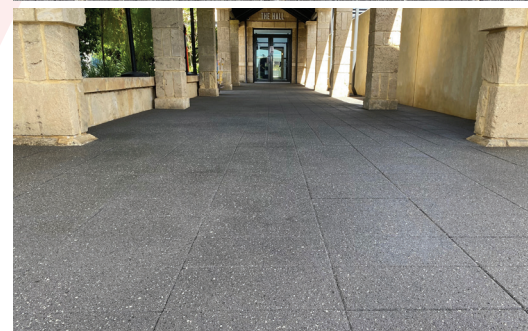

The Camfield Tavern is Australia's largest pub with 5 bars, an onsite micro-brewery and a large beer garden. The external areas of The Camfield featured old faded concrete pavers which were starting to look a bit worse for wear. Due to the size of the job it had to be completed in 3 stages consisting of the ramps, hallways and courtyards, the first stage commenced in late December 2020.

THE SOLUTION

Dulux Avista's resurfacing system was used throughout the external areas of The Camfield Tavern to cover the existing old concrete pavers. The system provides a non slip, decorative finish and the Resurfacing Oxide colours were selected to match the facade of the Tavern.

BENEFITS

- Dulux Avista Resurfacing Base Compound is suitable for application over existing cured concrete surfaces including pavers, making resurfacing a cost effective way to revamp the area without removing the existing concrete pavers and starting again
- The Dulux Avista Colour Oxides used to colour the Resurfacing Base Compound are available in a wide range of colours so it was easy to match the building facade and create a custom fleck finish
- Dulux Avista Extended Wear Sealer was used to seal the job, this is a highly durable protective clear coating designed to protect the substrate from weathering and ingress of dirt and grime, ideal for these high traffic areas
